Word Of The Week

soliloquy
so·lil·o·quy

noun
the act of talking to oneself or a dramatic speech that represents a series of unspoken thoughts.

-Kaylee Luong

The Dangerous Life of Raina Anderson- Fictional Story

"Here in this town, we have flowers, trees, and houses where we keep our children safe from the dark animals lurking during the night.

A very long time ago, one of our mighty men went and battled with the dark and vicious animals and chased them away. That is why we now have a free and mighty community where we all have our own responsibilities" said the old lady to the young children in a little tent about the story of the town called Maridoo. As the old lady was about to continue the story, a girl who had long brown hair with a flower crown decorated with colourful gems in the centre of the flowers on her head named Raina came in. She was the daughter of the man who chased away the dark animals.

"Grandma why won't you tell them about the mountains of Maridoo where this is town's name came from?" asked Raina.

"I can't I will startle the children." replied the old lady.

'Children class dismiss" she said as she sent them off to meet their parents.

Raina immediately hugged her grandmother and whispered in her ear

"Why didn't you tell them"

Raina's grandmother looked at her and said "Remember the time I told you the story? You were terrified after..."

" I wasn't that terrified" replied Raina confidently. The old lady sighed and said "Fine I'll tell them next time ok"

Raina smiled and nodded as she started to exit the room.

Visit next time for a continuation of the story.

YouTube Spotlight- Karina Garcia

She does DIYS, life hacks, pranks, make up tutorials, challenges, some vlogs, experiments, and reviews. She's very crafty, goofy, and creative! CSome of my favorite DIYS were her DIY giant mesh stress ball and her playdoh lipstick. If you like DIYs make sure to watch those there super fun and creative!!! Follow her on Instagram: @karinagarc1a and Snapchat: @ karinaa bear.

The Science Corner- Junior

Do you love science? Check out this area every week for a new science experiment!

Beautiful Milk:

You Will Need:

- a large, flat(ish) bowl
- milk
- food colouring
- laundry detregent mixed with water

Method:

1. Put some milk in the bowl. It doesn't matter how much
2. Add many drops of food colouring to the milk in different locations
3. Add some of the laundry detergent-water mixture. Observe what happens to the food colouring, and the milk.
4. Take a tooth pick and create designs with the food colouring

What's Happening?

The laundry detergent is repelling the food colouring and the fat in the milk separating them! Milk is actually a mixture of fat and liquid, but originally they won't mix. To make milk stay together, they add an emulsifying agent, to bind the fat and liquid particles. The soap is basically ripping the fat and liquid apart.
